

ESG UPDATE Q3 2023

Highlights and achievements Q3

- Assessing VTX’s approach to GHG Protocol reporting and envisions the ability to produce an inventory by EOFY 2024
- No KBA’s identified in the Hill End, or Hargraves regions near VTX’s NSW Exploration or Mining Projects
- Using the WRI’s Aqueduct Water Risk Assessment tool to create current Baseline Water Risk Assessments has confirmed that VTX projects - Hill End & Tambaroora and Hargraves - fall into the Low and Low-Medium Overall Water Risk categories respectively
- VTX is reviewing the TCFD recommendations to fully assess our climate-related risks and opportunities - pending new ISSB standards and guidance from the Australian government
